SAURABH LALIT PANDE

SDE — Node.js, Backend Systems

sp832154@gmail.com | 8421168035 | Bangalore, India | LinkedIn | GitHub

SUMMARY

Backend Engineer with 3+ years of experience building scalable, high-performance Node.js and Express.js systems handling real production traffic. Strong grasp of REST API design, microservices architecture, and database optimization across MySQL, PostgreSQL, and MongoDB. Practical experience diagnosing and fixing performance bottlenecks under load, including caching strategy and query optimization. Comfortable working with distributed, multi-service backends and troubleshooting production issues independently. Track record of improving backend performance and reliability by up to 30%.

CORE TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Backend & APIs: Node.js, Express.js, REST API Design, Microservices, High-Traffic/High-Transaction Systems

Databases: MySQL, MongoDB, PostgreSQL, Redis, Schema Design, Query Optimization

Cloud & Practices: AWS, Git/GitHub, CI/CD (GitHub Actions, Jenkins), Data Structures & Algorithms, System Design Fundamentals

EXPERIENCE

Full Stack Developer | Appbroda

08/2025 – 07/2026 | Bangalore, India

- Built and maintained scalable REST APIs on a PostgreSQL-backed microservices architecture handling ad campaign and asset management workflows under real production load.
- Diagnosed and fixed a slow-query problem under peak load, tuning PostgreSQL queries and backend pipelines to cut average query time by roughly 20%.
- Built a Chrome extension for automated data extraction, cutting manual data-entry effort by an estimated 25%.
- Contributed to code reviews and engineering standards across the team.

Software Development Engineer I | MyCLNQ Health

07/2024 – 08/2025 | Nagpur, Maharashtra

- Core contributor to a microservices-based backend for a healthcare platform on Node.js and Express.js, deployed on AWS, serving 10,000-1 lakh users.
- Diagnosed a production performance bottleneck on high-traffic endpoints and introduced Redis caching, reducing average API response time by an estimated 30-35%.
- Redesigned key request flows around asynchronous, event-driven processing to improve system reliability under load.
- Integrated multiple third-party services and a payment gateway (Calendly, Eshopbox, Credimax) via REST APIs into production workflows.

Full Stack Developer | Squad Technology Private Limited

01/2023 – 06/2024 | Thrissur, Kerala

- Diagnosed and fixed a booking-to-checkout backend bottleneck, reducing processing time by 30% through workflow and API redesign.
- Improved system efficiency by 15% through backend and database optimization.
- Built REST APIs for invoicing and email workflows, integrating multiple backend services.

FREELANCE PROJECTS

Admin Panel — Infradel Projects *(Node.js, Express.js, MongoDB, React.js)*

- Designed a role-based access control system with secure authentication; built scalable backend APIs.

EDUCATION

Master of Computer Applications *01/2023 – 04/2025*
University of Mysore, Mysore, Bangalore

Bachelor of Computer Applications *08/2015 – 07/2019*
Nagpur University, Nagpur, Maharashtra

Courses: Full Stack Development, Aimerzs (2025) — React.js, Next.js, Node.js, MongoDB, REST APIs, auth. | Backend Development, Relevel by Unacademy (2022) — Node.js, Express.js, system design, MongoDB/MySQL, async programming.
